

BENEFITS OF BECOMING A LOW CARBON MARINA

- Prepares your site for future regulation on climate change.
- Improves your marina's public image and increases patronage.
- Provides expert advice on the suitability of renewable energy, energy efficiency and waste management systems onsite at the marina.
- Demonstrates leadership and commitment to EPA objectives.
- Delivers cost savings and increases sustainability of your operations.
- Decreases your impact on the environment and helps to protect marine life.
- As an operator of a Low Carbon Marina site, you will benefit from the use of the Low Carbon Marina logos, flags and materials. Your business will receive a boost from the marketing of the Low Carbon Marina Initiative, which will be promoted across Australia.
